Romania

Daugavpils Saskanās pamatskola

Latvia

Meeting program:

- the final conference with a presentation of our project outputs
- final summary and evaluation of project work and its outputs
- practicing the skills that partners acquired within 3 years.
- preparation of the final report, finalizing outputs.

Tuesday, 13th June

After a short opening ceremony we started the Final Conference. First, the host - Halil Ibrahim Gul,

representatives of local Educational Board and school principal addressed the audience.

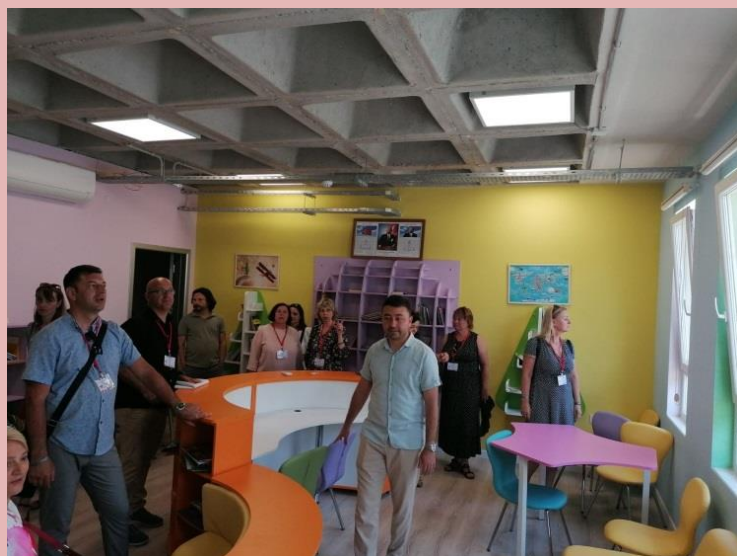

Then, main coordinator Dagmar Sitna, spoke out about the progress of the project, the difficulties we faced while working remotely and the outcomes of the project.

Then, Project Outputs were introduced by students and teachers: posters, videos, a comic book, project website.

After lunch we went on a tour around the school, accompanied by the Principal and Deputy Principal. The school is modern and well-equipped and at the same time very cosy and homelike. We asked our Turkish colleagues a lot of questions, compared with our schools.

The day continued with a visit the City Council, where we were welcomed by the Mayor of Datca.

We talked about educational system in the region, international cooperation in the field of education, future perspectives and plans.

Also we got to know some facts about the history of the region in the local musuem, which was small but very peculiar and interesting.

Thus, the day was eventful and we got so many impressions on the very first day!

Wednesday, 14th June

The whole day was devoted to the training on providing first aid in different situations. The training was held outdoor by the local rescue NGO.

Participants could practise the skills they acquired during this project.

And learn some new first aid skills and abilities; like action in case of natural disaster or searching for a missing person.

We we were very grateful to the rescure team for sharing their knowledge with us. It was an unforgettable and very valuable experience!

In the afternoon we continue our cultural program visiting Hizirsah Culture House and Old Town.

Thursday 15th June

Also the third day was no less exciting and useful: it was about safety on the water.

The conditions were very close to real ones, as we went on a boat trip.

Friday, 16th June

The last day started with Coordinators Meeting. We summed up the meeting, allocated responsibilities and discussed the final report.

Then it was time for Certificate Awarding Ceremony.

KNIDOS

The rest of the day we spent in the ancient city of Knidos which is located in a very picturesque place, at the end of peninsula; with spectacular views of the coastline and mountains.

Apart from breathtaking views, this place is of great historical value; so the excavations were carried out by the scientists. The agora, the theatre, an odeum, some temples and a great number of minor buildings were identified, and the general plan of the city was made out.

It's was really amazing when you touch such ancient history! That feeling is difficult to convey in words or photos!

These days went by very quickly. Discussing the results of our three-year cooperation, we all came to the conclusion that the project fully achieved its goal. And we could be proud to get our certificates. However, it is always sad to say “Goodbye”

We learnt a lot. We summarize the results and the outputs of the project. We discuss the possible ways of further dissemination. And we gain an unforgettable experience and very warm impressions.

We would like to extend a big 'thanks' to our Turkish partners for their hospitality and very good organization of the meeting!
